Cx Nav Bar is a drop down menu for your website, menu is made in macromedia flash, it has nice sounds and movement animation.

This menu is easy to use like all the menus that we develop; you have to

place it in your web site just like an image or like any flash file, then you open the XML file with a text editor like notepad from windows and change the buttons text, url to open and other options for the menu. This menu will give a new look to your web

site. Menu was updated, now it can have an unlimited number of main buttons and unlimited number of sub buttons. Sub menus movement code has been changed, you can set a delay for the rollout actions so that the sub menus close instantly or

wait a bit before going up. You can also set button size in the new version. Advanced flash users can use other available action in addition to opening an URL, these additional actions are loadmovie, gotoandstop, gotoandplay,

fscommand, function
(the last one can be set
so that the menu calls a
function inside the flash
file). Nav Bar Pro is an
easy to use navigation
bar for you website. You
just drop it into a place
of your website and turn
it on. Nav bar will be at
the top and it looks as a

dropdown menu. It is possible to change button text, link, hover text and hover sound. It is possible to set any button in a way that it will open new page in your website. You can change button size. It is also possible to add your own fonts and colors.

Nav Bar Pro

What's New In CX Nav Bar?

This is a drop down nav bar for your web page, it is made in Macromedia Flash, it has nice sounds and motion animation.

This menu is easy to use like all the menus that we develop; you have to

place it in your web site just like an image or like any flash file, then you open the XML file with a text editor like notepad from windows and change the buttons text, url to open and other options for the menu. This menu will give a new look to your web

site. · Change Log:
14/04/2008 - first
version with manual
update of the menu, now
you can download the
update version .

Installation: 1 - Upload
the xml file to the server
2 - Open the xml file
with a text editor like
notepad from windows.

You should see something like the image below . Information: Source code is in LESS A well commented code, so anyone who wants to develop other version can edit it without any problems. Also, in the menu some actions can be called as flash movie,

these actions are:
loadmovie, gotoandstop,
gotoandplay. Back
