Coming out of the experience of music creation for game DEEP SPACE ANOMALY, a series of audio works of varying range and complexity is presented. During game play, music has to accompany characters, convey them mood, - all this without interrupting gameplay (and player's attention). The main hero of the game is the spaceship Hyperspace. The nature of its activity is worthy of meditation for cosmonauts, but it still requires more atmosphere for real participants of the game than the usual quotes and epithets from deep space novels and sci-fi movies. The ship Hyperspace is inhabited by a pilot, a computer and a crew which is rather like a marionette drama in a space ship. The main motive and aesthetic concept of this musical work is to create a symphony of small noises of multiple genres, such as aeronautic, underwater, animal and human. Collectively these noises form a subtle but dynamic backdrop inhabiting the Hyperspace, a perfectly described place. The atmosphere changes and evolves together with the logical process of the game. Also integral components of the work are original compositions which bear personal and abstract aesthetics. This work is presented in a bundle with the music and sound effects, official trailer, high quality pictures and other related materials which should make the game more attractive to professional gamers. s (song) "The Christmas Carols" is a piece of music that became one of the most popular holiday songs in the United States. Popularized by various artists, the song lists as number one in Billboard Magazine's Hot 100 chart for the best-selling Christmas single for over thirty years. The song is now known by many because it has become one of the most commercially successful songs ever written. Inspiration The song's theme of warm humanity has been a subset of each artist's personality and style. Frank Sinatra's version uses yuletide as a frame for non-traditional romanticism. The song was an on-going composition of his during the process of writing for On the Town. Sinatra's version was influenced by the work of Leon Russell, Jackie DeShannon, Neil Sedaka, and other composers. Sinatra's version was one of the last songs he recorded before his death in 1998. The instrumental version of the song was originally recorded by The Four Freshmen for their 1958 album "Fennelly's Fables." The version from that album is the version that is actually most often heard sung by people who are unfamiliar with the music. Sinatra's lyrics, written by Sammy Cahn, are perhaps the most well-known of the song. Cahn's lyrics are based on the 1843 German Christmas play, The Wild Knight. Leon Russell's version is played in a ballad tempo. Russell wrote the melody and chord progressions in one single night. The Four Freshmen's version is a rockabilly rendition. Neil Sedaka's arrangement included a fluctuating upper register and a higher range, than all of the other versions. His version is a comedic, upbeat harmony with orchestral touches. Three years later, Sedaka had a successful album with "Christmas Album". After that, Sedaka remixed the solo of The Four Freshmen. Dick Joren's and Bette Midler's renditions are among the most recognized versions of the song. The original version was more of a romance, with the song being a courtship for the couple (Dick Joren and Bettie Midler). As time went on, the song began to become more romantic. The songs were very well received in their first appearances. However, Joren and Midler were not successful in following through on their artistic visions. Both artists attributed this to the volatile nature of record sales. Dick J
