The story of Wolverine is an interesting one, as he is not only a X-Man but he is also a hybrid of human and animal. His claws can extend, retract and retract into his fists. This allows him to be much more agile than a normal human. Wolverine is a member of a race of alliterative names that include Androdite, Ami, Axelrod, and Branden Lee. Despite his origins, he was raised by the mutant professor, Charles Xavier to be an honor student and to be a hero. He was very close to Charles and tended to take it personally when he was hurt. He would never be the warrior that Charles knew he was. Along with the X-Men, he had been sent on a mission to London, England. Over the centuries, he had grown close to the local inhabitants, including a girl named Laura. The mission was to stop a group of Chinese triads called the Hand from obtaining a new artifact known as the Infinity Gem. They only needed one of the gems to complete a powerful weapon known as the Weapon X. Maximizing the usability of the bmp Hello all, I'm currently doing some work on the bmp format and I'm wondering if anyone's ever come up with a better way of modifying the bmp file so that it can be maximized to make for a more usable file? The bmp format, as it stands now, is a square chunk of data. This is good for
